

GREEN STATUS

The recent climate change and the concern for our planet made us, from Jacob Kongsbak Lassen, look into the future and our environment and act upon it.

That's why we now have around 93% of our waist fraction recycled through a partnership with the company Ragn Sells, having a consequent reduction to minimum possible dispersion of waist in the environment.

Jacob Kongsbak Lassen has , from september 2010, fulfilled the EU targets and requirements for waste recycling quantities.

We now can, very proudly, inform that Jacob Kongsbak Lassen is a Green Company and part of making a better world throughout recycling.
